

# MICE PREP SHEET

On \_\_\_\_\_ our technician will be arriving at your home to treat for Mice.

Please complete the following **BEFORE** your treatment. If you have any questions, please call our office for clarification.

## TO ENSURE SUCCESS THE FOLLOWING PREPARATIONS MUST BE DONE

1. Remove enough items from kitchen and bathroom cupboards below the sinks to allow us to access the back of the cabinet.
2. Clean all kitchen and bathroom surfaces ensuring they are clean and grease free, especially those areas around the fridge, stove, microwave and toaster.
3. Reduce clutter! Mice hide in cluttered areas, and they use paper to build nests.
4. Ensure the area next to the outside walls and the garage, crawlspace, attic, storage areas, are neat and tidy.
5. Throw out garbage daily and ensure dirty dishes are not left out overnight.
6. Ensure pet food is secured in sealed plastic containers, and is not left out after the pets have fed.
7. Remove bird feeders from decks or back yards, and clean up all spilled seed.
8. After our treatment is complete all contents may be put back in the cupboards.
9. Holes around plumbing and heating pipes should be closed with steel wool after the mice have been eliminated.
10. Exterior entry points and gaps under outside doors should be closed immediately.
11. We will be placing a variety of snap and/or glue traps. Please do not touch the traps.

If you have any questions regarding preparation, please call our office for details and clarification.
